DECKSHIELD -

parking protection

At Flowcrete, we are committed to transforming contemporary parking structures. Global clients, engineers, architects and developers are demanding high performance systems to avoid structural failure. As a technology driven manufacturer, Flowcrete is constantly developing new systems for new builds and renovation projects to deliver safer, more attractive and functional parking environments.

Our protective waterproof parking decking system, DECKSHIELD, visually improves parking environments, has a highly accredited fire rating and is exceptionally durable and hard wearing. These qualities make it the product of choice for today's parking structures, where first impressions count.

ENHANCING visual appeal

Parking structures in the twenty first century have a crucial role to play as the first point of call for a visitor to any public, private or commercial building...

The parking area is the 'front door' of the building, while at the same time serving its essential primary functional role. There is no doubt that first impressions count and appearance, ease of use, signage, bright lighting and clear directional marking all help to make a parking zone a more positive and safer environment for the car owner.

By utilizing the very best of protective coating systems on the internal structure of the parking area, visual appearance can be enhanced, light reflectivity can be improved, traffic movement can be regulated and ongoing structural maintenance can be kept to an absolute minimum.

As the growth in construction of commercial structures continues, more and more cars visit airports, retail malls, hotels, office blocks and public buildings on a daily basis – it is crucial to make that first impression count.

DECKSHIELD

benefits

The **DECKSHIELD** range from international flooring manufacturer Flowcrete offers clients the perfect balance between design aesthetics and practical performance.

DURABLE - Deckshield is exceptionally hard wearing, with high durability and abrasion resistance allowing it to stand up to the heavy traffic associated with car parks.

SAFE - The Deckshield range includes a variety of profiled anti-skid finishes, making it the perfect choice for any parking environment where the safety of visitors is key.

CREATIVE - Deckshield offers a wide variety of colors and styles for an eye catching, light reflective finish that defines vehicle and pedestrian areas and brightens dull environments.

FAST TRACK - Deckshield uses cutting edge resin technology enabling rapid application and early return to service with minimal downtime and disruption.

LONGEVITY - Deckshield is hard wearing and crack-resistant, lengthening the structure's lifecycle and minimizing future reinstallation costs as well as disruption and downtime.

ENVIRONMENTAL - Deckshield is an environmentally friendly system, low in volatile organic compounds and safe for use in confined areas.

NOISE REDUCING - Deckshield's finish reduces unwelcome tire squeal; an unpleasant yet common problem, particularly in internal parking environments.

RESISTANT - Deckshield's flexible waterproof membrane delivers a high performance, crack-resistant finish that also withstands attack from chemicals, petrols and oils.

Approved and tested worldwide, all systems within the Deckshield range come backed by the sales support, technical services and quality that customers have come to expect from Flowcrete. Installed by a network of fully-trained and monitored expert floor installation teams, Flowcrete's Deckshield is the ideal choice for a variety of car park environments.

TOP tip

Our Deckshield range includes outdoor parking finishes, able to withstand the most extreme of weather conditions.

DECKSHIELD will transform a parking structure; protecting it over time while simultaneously brightening up the environment with the addition of color...

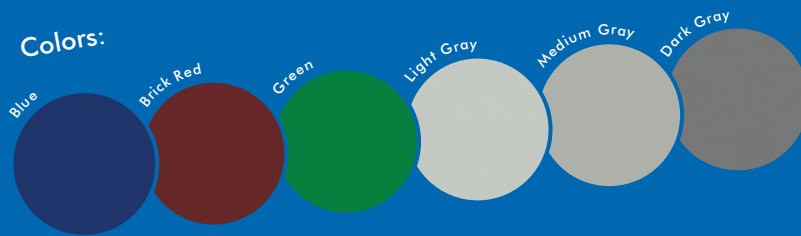

MMA BASED deckshield systems

DECKSHIELD systems have been designed to cosmetically enhance the parking areas, reduce noise and waterproof multi-story parking structures world wide. These systems make multi-story parking zones lighter and safer environments to visit. DECKSHIELD products are suitable for renovation of existing parking zones as well as new construction projects.

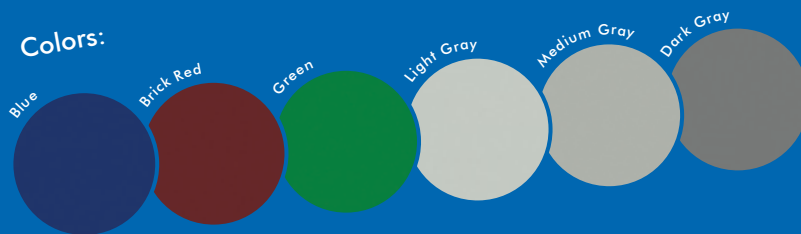

DECKSHIELD RAPIDE ED is a solvent free, methyl methacrylate (MMA) parking deck coating system which provides a colorful crack bridging, waterproof wearing surface for use over exposed decks of multi-story parking structures.

Colors:

DECKSHIELD RAPIDE ID is a solvent free, methyl methacrylate (MMA) parking deck coating system which provides a colorful crack bridging, waterproof wearing surface for use on intermediate decks of multi-story parking structures.

KEY clients

- InterContinental Hotel Group
- Kuala Lumpur International Airport
- Dubai International Airport
- Heathrow International Airport
- Westfield
- Soccer City Stadium
- Marks & Spencer
- NCP

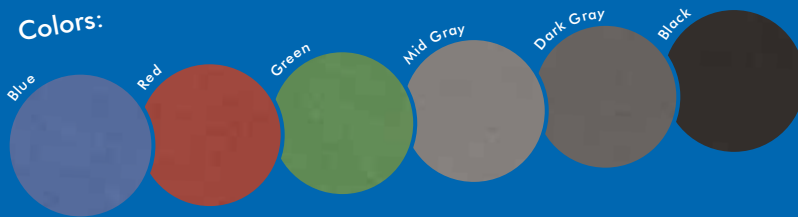

POLYURETHANE BASED deckshield systems

DECKSHIELD systems are exceptionally hardwearing, standing up to both foot and vehicular traffic as well as withstanding the chemical attack associated with parking structure environments. This maximizes the lifecycle of the installation and minimizes the associated environmental impact of future renovations. The **DECKSHIELD** range is low in volatile organic compounds and is safe for use in confined areas.

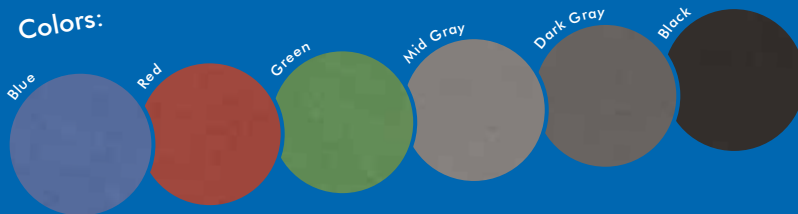

DECKSHIELD ED is a low VOC, solvent free, flexible, polyurethane parking garage coating system which provides a colorful, waterproof wearing surface for exposed parking structures.

Colors:

DECKSHIELD ID is a cost effective, flexible, solvent free, polyurethane parking garage coating system which provides a colorful, waterproof wearing surface for intermediate decks of multi-story parking structures.
