

MT SERIES

CONSTRUCTION telescopic handlers

SUCCESS THROUGH IMAGINATIVE POWER

MANITOU, the world's largest manufacturer of rough terrain forklift trucks, has its roots in a family tradition of innovation and imaginative power. For generations, the Braud family has dedicated themselves to creating innovative products for the lifting and handling markets.

Manufacturing its first truck in 1958, MANITOU is a pioneer in the rough terrain forklift market. By responding to market trends, MANITOU offers a complete line of rough terrain handling equipment adapted to the specific needs and challenges of each industry.

The long history of reliable, relevant equipment has led to more than 300,000 MANITOU rough terrain forklifts operating daily in more than 120 countries. This worldwide presence is backed up by a MANITOU dealer network staffed with trained mechanics and sales specialists to help you with your material handling requirements.

OVERACHIEVER

The MANITOU MT Series construction telescopic handlers are true overachievers. With soaring lift heights and impressive load capacities, these machines are designed to handle material in high places.

MANITOU MT Series construction telescopic handlers are known for their rugged, heavy-duty build and compact design. These machines were created to handle a wide variety of tasks in the most demanding conditions.

NEW MT 5519: TIER IV

- Maximum lift capacity of 5,500 lbs. (2495 kg)
- Maximum lift height of 19'1" (5.8 m)

MT 6034 / MT 6642 / MT 8044

- Maximum lift capacities from 6,000 lbs. (272 2kg) to 8,000 lbs. (3629 kg)
- Maximum lift heights from 34'3" (10.4 m) to 44'0" (13.4 m)

MT 10044

- Maximum lift capacity of 10,000 lbs. (4536 kg)
- Maximum lift height of 44'0" (13.4 m)

MT 10055

- Maximum lift capacity of 10,000 lbs. (4536 kg)
- Maximum lift height of 55'1" (16.8 m)

MT 12042

- Maximum lift capacity of 12,000 lbs. (5444 kg)
- Maximum lift height of 42'0" (12.8 m)

Although it's modest in size, the all-new, **MT 5519 telescopic handler** is the right machine when there's demanding work to be done in small spaces. With a lift height of 19'1" (5.8 m) and a maximum load capacity of 5,500 pounds (2495 kg), this machine will deliver big results in confined spaces.

COMPACT PERFORMANCE

Don't be fooled by the MT 5519's compact size. This machine is built for performance with a lift capacity of 5,500 pounds (2495 kg) and a powerful 69-hp (51.5 kW) Tier IV-certified Yanmar diesel engine.

BUILT FOR LIFE

A double-wall rear tower and robust, heavy-duty boom nose provide the added strength where it is needed most, increasing machine performance and longevity.

EXTREME MANEUVERABILITY

With a turning radius of just 11 feet (3.4 m) and an overall height of only 6'4" (1.93 m), the MT 5519 makes working, and turning, in small spaces easy.

ENHANCED TRACTION

The two-speed transmission provides a high speed for ground travel up to 15 mph (24 km/hr) and a lower speed for extra tractive power.

SUPER-COMPACT**PERFORMANCE**

The MT 5519 is packed with time-saving and operator-friendly features making it not only productive, but cost effective to own and maintain.

TIME TO MULTI-TASK

The MT 5519 easily adapts to meet your needs with a variety of available attachments including truss booms, jib booms, buckets, multiple types of carriage forks and more.

STEER CLEAR

Three selectable steering modes, 2-wheel, 4-wheel and crab, allow operators to maneuver through complicated obstacles with ease.

HYDRAULIC PERFORMANCE

Hydraulic flow up to 20 gpm (76 L/min) provides excellent hydraulic performance. Optional auxiliary hydraulics are available to power a variety of available attachments.

BUILT SMART & EFFICIENT

MANITOU MT 5519 offers comfort and an ergonomic design with plenty of adjustable features to meet the needs of a variety of operators. Ease of serviceability is built into the design as well.

OPTIONAL ENCLOSED CAB

The enclosed cab option is suited with front and top windows, a door and a heater/defroster for use in areas where operators need protection from the weather. Air conditioning can be added for a complete climate controlled environment.

IN CONTROL

Two standard, easy-to-reach, direct mechanical joystick controls provide smooth operation for boom and fork tilt functions, optimizing operator precision and productivity.

EASY TO MAINTAIN

Engine accessibility is made simple with a large, hinged hood on the side of the machine. The hood lifts fully out of the way, allowing plenty of room to access maintenance points, including the battery and oil fill. A hinged door in the belly pan grants access to the oil drain.

MT 6034 • MT 6642 • MT 8044 • MT 10044 • MT 10055 • MT 12042

**“Maximize
your return on
investment”**

Once again, MANITOU delivers reliable, robust material handling solutions with the **MT Series** construction telescopic handlers. These models add impressive capacities and high lift heights to MANITOU's telescopic handler portfolio.

MOVE MORE MATERIAL

Robust, welded-box section booms handle loads from 6,000 pounds (2722 kg) on the MT 6034 to 12,000 pounds (5444 kg) on the MT 12042.

LIFT HIGHER

Reach, pick, lift and place easily with lift heights from 34'3" (10.4 m) on the MT 6034 to 55'1" (16.8 m) on the MT 10055.

TURBO-DIESEL ENGINES

Equipped with John Deere Interim Tier IV-certified engines, these machines have raw power up to 115 hp (86 kW) to provide the strength and response needed for demanding work.

HISTORICAL EXCELLENCE

The *MT Series* telescopic handlers are a result of MANITOU's long history of material handling experience. Only the oldest manufacturer of compact telescopic handlers could design a machine to meet and exceed equipment owners' expectations of material handling equipment.

REACH FURTHER

Forward reach from 23 to 41 feet (7 to 12.6 m) make material handling more efficient.

IMPROVE STABILITY

Standard rear axle stabilization improves stability by locking the rear axle whenever the boom is raised 60 degrees or the parking brake is applied. Stability is further enhanced with the addition of outriggers available on models MT 6642, MT 8044, MT 10044, and MT 12042; standard on MT 10055.

FAST AND MANEUVERABLE

With travel speeds up to 20 mph (32.5 km/hr), a compact design, three steering modes and a tight turning radius, the MT Series telescopic handlers get around jobsites quickly and efficiently.

GO AHEAD, GET COMFORTABLE

MANITOU MT Series feature adjustable, ergonomic operators stations and easy-to-use controls for optimal comfort for any operator.

OPTIONAL ENCLOSED CAB

The enclosed cab option is equipped with front and top windows, a door, and a heater/defroster for use in areas where operators need protection from the weather. Air conditioning* can be added for a complete climate controlled environment.

**Not available on MT 6034.*

BE IN CONTROL

The optional tri-function joystick control allows the operator to control attachment tilt, auxiliary hydraulics and boom functions with a single joystick and speed control knobs.

OPTIMIZED COMFORT AND SAFETY

An adjustable armrest and optional suspension seat enhances operator comfort for long, productive workdays. The operator has an unobstructed view virtually 360 degrees in all directions for increased precision and safety.

**“More options
mean more
flexibility”**

Increase your operation’s flexibility with the **MT Series** construction telescopic handlers from MANITOU. These versatile machines offer a variety of performance features and options so you can tailor them to suit your needs.

PERSONNEL WORK PLATFORM (PWP) SYSTEM

The optional Manitou PWP System allows the safe and efficient use of an ANSI/ITSDF B56.6 compliant work platform.

The PWP System makes every job almost as easy as working at ground level. When the system is engaged the transmission is temporarily disconnected, the rear axle stabilizer is engaged, the frame leveling speed is reduced, and the parking brake is applied. A remote shut-off is located on the platform. This increases safety and allows for precise positioning.

WORK ELEVATED

REMOTE BOOM CONTROL (RBC) SYSTEM

With the RBC System option, a single operator can control boom and engine functions from outside the cab. When placing loads, an operator can leave the cab to control boom functions from a location that has better visibility – even from within a building.

- Controls boom functions and engine power-up and shut-down from outside the cab.
- Includes all the safety functions of the Manitou Personnel Work Platform (PWP) System and is Compatible with any ANSI/ITSDF B56.6 compliant work platform.
- Can be used with any approved quick carriage release attachment and the 180° swing carriage that allows workers to work alongside a building without repositioning the machine.
- Transmitter is operated by a radio-control transmitter and made from strong polymer material that is resistant to shock and impact.

TAKE CONTROL

HOW IT WORKS

To activate the Remote Boom Control (RBC) System, apply and hold the service brakes and press the top of the RBC System rocker switch. The system is activated when the lamp in the RBC rocker switch is on.

The RBC System:

- Places the transmission in neutral and applies the parking brake.
- Locks the rear-axle stabilizer cylinder and reduces the frame leveling speed.
- Disables auxiliary hydraulic and carriage swing functions.
- Turns on the radio-control receiver for controlling boom functions and engine power-up and shut-down.
- Monitors the position of the machine and will not allow operation unless the machine is properly leveled.

**“They’re reliable
and versatile”**

With the variety of attachments available for the **MT Series** construction telescopic handlers, your operation can do anything from material handling to lifting workers.

HYDRAULIC PERFORMANCE

Excellent auxiliary hydraulic flow and system pressure provide the hydraulic performance needed to power a wide variety of attachments.

SELF-LEVELING

Hydraulic self-leveling lift action automatically keeps the load level as the boom is raised.

PERSONNEL WORK PLATFORM (PWP) SYSTEM

Works with any ANSI/ITSDF B56.6- compliant work platform to increase jobsite safety and versatility.

FAST ATTACHMENT TRANSITION

The quick carriage release system allows quick attachment changes with unsurpassed ease. The operator leaves the seat only to disengage the attachment.

MULTI-TOOL CARRIER

MT SERIES TELESCOPIC HANDLER ATTACHMENTS

SWING CARRIAGE

90° and 180° swing

LOG AND PIPE

with grapple arms

JIB BOOM

5' (1.52 m) with winch and 50' (15.2 m) cable or 60' (18.3 m) cable

FORK SHIFT

50" (1.27 m) wide

ROTATING CARRIAGE

48" (1.22 m) wide

66" (1.68 m) wide

PERSONNEL WORK PLATFORMS

TRUSS BOOM

5' (1.52 m) or 8' (2.44) without winch

12' (3.66 m) or 15' (4.57) with optional winch

CARRIAGES

Masonry, framing and standard carriages in a variety of widths

MT SERIES TELESCOPIC HANDLER LOAD CHARTS
