Introducing Spectrum[®] Construction Software

Thousands of contractors rely on Spectrum[®] Construction Software every day to help run their businesses. Dexter + Chaney's construction management software provides complete accounting and operations software that is easy to use, available online, and more affordable than ever.

Spectrum provides all of the features you expect in construction management software:

> Job Cost Document Imaging Equipment Management Equipment Control Equipment Tracking **Preventive Maintenance Fixed Assets Resource Scheduling** Purchasing + Inventory Human Resources + Payroll Accounting Accounts Pavable Accounts Receivable Cash Management General Ledger Spectrum Mobile Time + Materials Billing Project Management Reporting Info-Link Query Developer Service Management Service Contracts Work Order Materials + Aggregate Management Spectrum Enterprise Checks + Forms

Spectrum's latest release is the most innovative new version of software in Dexter + Chaney's 30+ year history. Spectrum has entered the cloud. But we've done much more than simply move our existing software to a hosted environment. We've completely redesigned the user interface and user experience, creating the construction industry's easiest to use and most accessible business management software.

The Spectrum Experience

The experience begins with the dashboard. This is your launch pad to all your most important information. Customize the dashboard by choosing from a wide variety of applications, from job cost graphs to industry newsfeeds. Simply drag and drop them using the Dashboard Builder. When you want to take a deeper look into the information, simply click on a dashboard element and drill down to the details in Spectrum.

Companies use Spectrum to run their entire construction business, so we decided to make Spectrum available to everyone. All your employees can log in and access the dashboard to see important company information—and it costs you nothing! When you're ready to do some work choose from a list of favorite tasks in your navigation bar, or use the Info Bar to select something specific—a job, a vendor an employee, a report, and so on. Your dashboard turns into a desktop setup for you to work on the task you've selected, and the Info Bar options change to display relevant information and navigation.

Spectrum's browser-based interface opens a tab for every new task and lets you keep your tabs open and accessible. You never have to close and re-open screens or remember how to move through complex menus. With Spectrum Construction Software, all your information is one click away.

Doing More For Less

Less complexity. Less effort to get up and running. Less investment in hardware, operating systems, and databases. And less time spent installing, maintaining, and upgrading your software. Spectrum delivers lower cost of ownership because we deliver a true cloud solution. There is no software to maintain, no special hardware to purchase, and no updates or upgrades to install.

If you choose, it's easy to install Spectrum on your own server and because it's browser-based you still won't have to install software on client machines. You simply access your company network, open a browser, and get to work.

If you're comfortable with using web-based software then choose the cloud option and completely avoid any hardware purchases or software maintenance overhead. With Spectrum, security isn't a problem. Your data is your own and is protected by the same level of encription used for online banking.

Either way, you get the full Spectrum experience with less upfront investment and less ongoing operating cost than ever before. And as always, once you purchase Spectrum, you never pay again for any new version or update.

Take Spectrum out for a test drive! Contact Dexter + Chaney at 800-875-1400 or email us at showmespectrum@dexterchaney.com.
