

SlatTrax[®]

Optimal protection of ground from heavy equipment damage

U.S. Patent No. 8,998,529

Advantages

- Smart alternative to overlapped plywood, mats, etc.
- Easy to deploy and retrieve
- Increase productivity (95% less time than plywood or mats)
- Less labor yields more profit and happier customers
- Avoid unnecessary injuries

Features

- Trax - durable ¾" thick recycled plastics
- Mainframe carries Trax and deploys them with hydraulics
- Roll out (and retrieve) 100' of Trax in less than 2 minutes
- Disconnect Trax sections as needed
- System performs on turf, hardcover, hills and curves (<17' radius)

Other Equipment Mount Options

Compact Excavator

Mini Skid Loader

Simple to Operate (Skid Loader Option Shown Here)

Roll Out...

Dispense Trax™ (100' in 2 minutes)

Release...

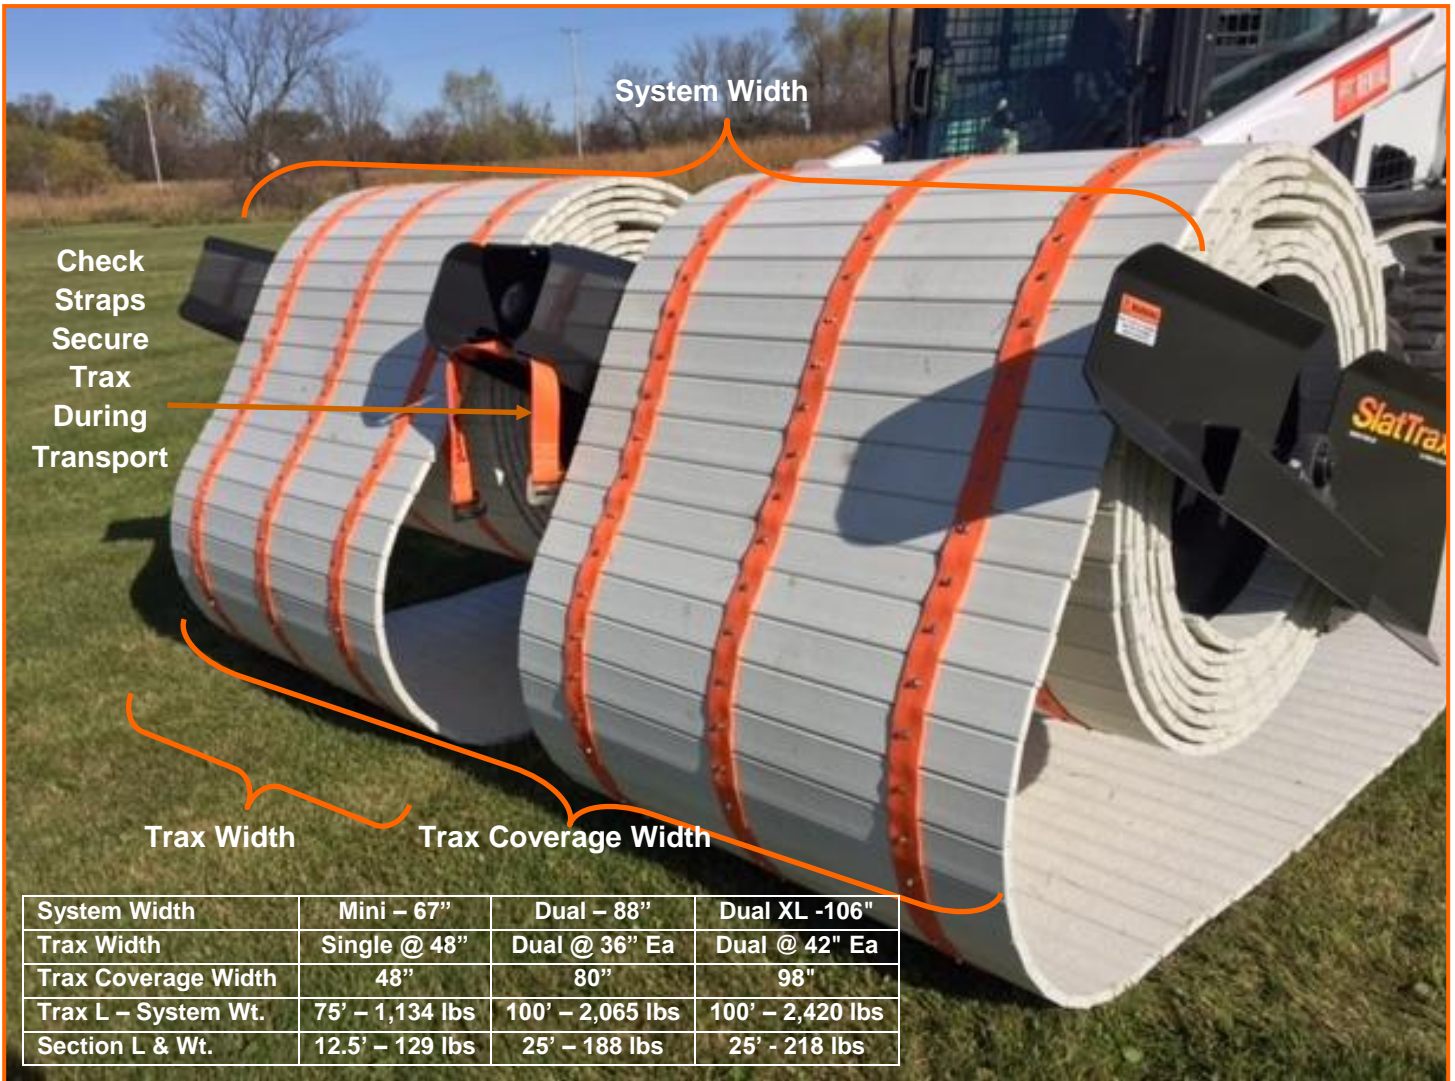

Disconnect 25' Sections as Needed
Trax can be Maneuvered on Ground to
Achieve Desired Coverage

Retrieve...

Connect Trax to Spool Harness - Back
up and Begin Roll up of Trax onto
Spools

Additional Product Information

System Width	Mini – 67"	Dual – 88"	Dual XL -106"
Trax Width	Single @ 48"	Dual @ 36" Ea	Dual @ 42" Ea
Trax Coverage Width	48"	80"	98"
Trax L – System Wt.	75' – 1,134 lbs	100' – 2,065 lbs	100' – 2,420 lbs
Section L & Wt.	12.5' – 129 lbs	25' – 188 lbs	25' - 218 lbs

When ordering SlatTrax, consider the weight capacities and track base of your equipment. Additional sections of Trax can be added to the system as required.

SlatTrax Trailer

- Designed for Dual Trax systems
- Wired and road-ready
- Drive-up to attach plate
- Built-in winch tie downs
- 12.5' long, 5' wide, 520 lbs.
- 5.5' high fully loaded (100' Trax)
