

VANGUARD™

COMMERCIAL POWER

BRIGGS & STRATTON

Game Changer.

Introducing the first single cylinder, horizontal shaft commercial engine designed from the ground up in almost two decades.

New
Vanguard™
200

Productivity comes standard.

Standard Cyclonic Air Filtration

Extends air filter replacement intervals up to 600 hours

- > **True cyclonic air chamber** actively manages the airflow
- > **Advanced Nano Filter Media with Autoshed Technology** provides 120% more dust holding capacity

Standard TransportGuard® 3 in 1 Controls

Simplified controls for simplified operation and exclusive TransportGuard technology reduces downtime due to oil dilution during transport

- > **Exclusive TransportGuard** feature shuts the fuel off with the ignition
- > **Combined throttle, ignition and fuel control lever** provides user-friendly operation

Standard Cold Weather Starting

Designed and tested to start easily down to -20°F

- > **Advanced design of ignition, combustion and carburetion systems** deliver reliable, easy starting in all seasons
- > **All new governing system and mechanical compression release** improve cold weather starting
- > **Plated carburetor surfaces** help resist corrosion and build-up caused by stale fuel

Standard Extended Maintenance Intervals

Reduces time in the shop and increases time on the jobsite

- > **Advanced oil management system** allows the engine to run efficiently for up to 200 hours between oil changes
- > **Micro spun Nano Filter Media with Autoshed Technology** extends recommended air filter maintenance intervals to 600 hours

Standard Superior Support Solutions

A superior performing engine is just the beginning

- > **The parts you need when you need them**, wherever you may be in the world
- > **Technical support** is just a call or click away, 24/7/365
- > **Industry-leading global 3-year limited commercial warranty¹** processed in 48 hours or less
- > **Service education** that trains over 6,000 service technicians annually
- > **Always genuine parts**, priced with your bottom-line in mind

Standard User Comfort

User comfort is a critical factor in productivity

- > **40% quieter operation**
- > **15% less vibration**
