shifting techniques. The company also uses all-electric auxiliary power units (APUs) to reduce idle time and fuel consumption, and employs alternative fuel research and development for KENCO's over-the-road (OTR) tractor fleet.

KENCO's material handling solutions use solar panel installations to produce alternative energy to offset power consumption, and conduct network optimizations often to reduce transportation and labor redundancy waste.

PENSKE LOGISTICS
(www.penskelogistics.com)

Some of the technology Penske uses to ensure its food and beverage customers receive the best service for their time-sensitive products includes real-time
