

Flexible Solutions

DURAFLEX[™] INC.

for Rigid Applications

ENGINE EXHAUST

FLEXIBLE COMPONENTS & ASSEMBLIES

CUSTOM

STANDARD

- Bellows
- Braided Connectors
- Pump & Compression Connectors
- Expansion Joints
- Exhaust Flex
- Exhaust Wye Manifold Assemblies
- Tubing / Elbows / Adapters
- Hose & Hose Assemblies
- Jacket Water Connectors
- Interlock Hose, Bulk & Assemblies
- Hydraulic Hoses
- Exhaust Clamps & Hardware

NON-FLEXIBLE COMPONENTS & ASSEMBLIES

DIESEL

GASOLINE

- OEM & Repair Exhaust Components
- Hose & Hose Assemblies
- Tubing / Pipe
- Flanges
- Custom Mitering
- Elbows / Adapters / Cones
- Insulation
- Reducers

Flexible Solutions

DURAFLEX™ INC.

for Rigid Applications

ENGINE EXHAUST

EXPANSION JOINTS & BELLOWS

CUSTOM

STANDARD

- Hydroformed Bellows
- Mechanically Formed Bellows
- Hydraulically Formed Bellows
- Exhaust & Turbo Assemblies
- Single & Dual Configuration
- Externally Pressurized
- Pump Connectors
- Turbine Joints
- Expansion Compensators
- Custom High Temperature
- Extreme Vibration Resistant Bellows

SELECTION

Proper selection & application of an exhaust component is a key element in its operation & life. Improper selection & application will lead to problems in the field causing failure down time & system problems. When selecting a bellows/expansion joint, the following important factors should always be considered:

- Pipe or Tubing size
- Dimensional Constraints/Restrictions
- Normal or Maximum Working Pressure
- Maximum Temperature
- Type of Movements (axial compression/extension, lateral, angular)
- Concurrent Movement amounts
- Flow Rate/Velocity through the bellows/expansion joints
- Media Type flowing through expansion joint (gas, steam, oil, water, corrosives, etc.)
- End Fittings Type (flanges, weld ends, special fittings)
- Extreme Service Conditions (vibration, excessive motion in more than one plane, etc.)

History reflects when these basic factors are considered during the initial design stage, the product will perform as intended with the expected cycle & service life's.

SERVICES: full system design, engineering analysis, component drawings, FMEA & system re-design.
