

Social Apps

One Network's Social Apps enable enterprises to collaborate in a variety of ways both within their company as well as across their partners, customers and vendors.

WHAT SOCIAL APPS DO FOR YOU

- EASY COLLABORATION**
Social Apps makes working together simpler and more productive, whether with colleagues or outside trading partners and customers
- SECURE COMMUNICATION**
 Go beyond email and phone calls with 21st century social networking tools like secure chats, posts, and hashtags
- GAIN INSIGHT**
 Understand the hidden connections that affect your world, your industry, your company, and you.
- MOVE FASTER**
 Shorten the cycle to find corporate buyers, sellers, and partners.

WHAT ARE THEY?

One Network's Social Apps are enabling for the first time unstructured communication and collaboration across multiple enterprises and networks of trading partners in a secure environment.

Unlike the consumer social networks, which are centered around individuals, *One Networks' Social Apps are centered around companies and their employees.*

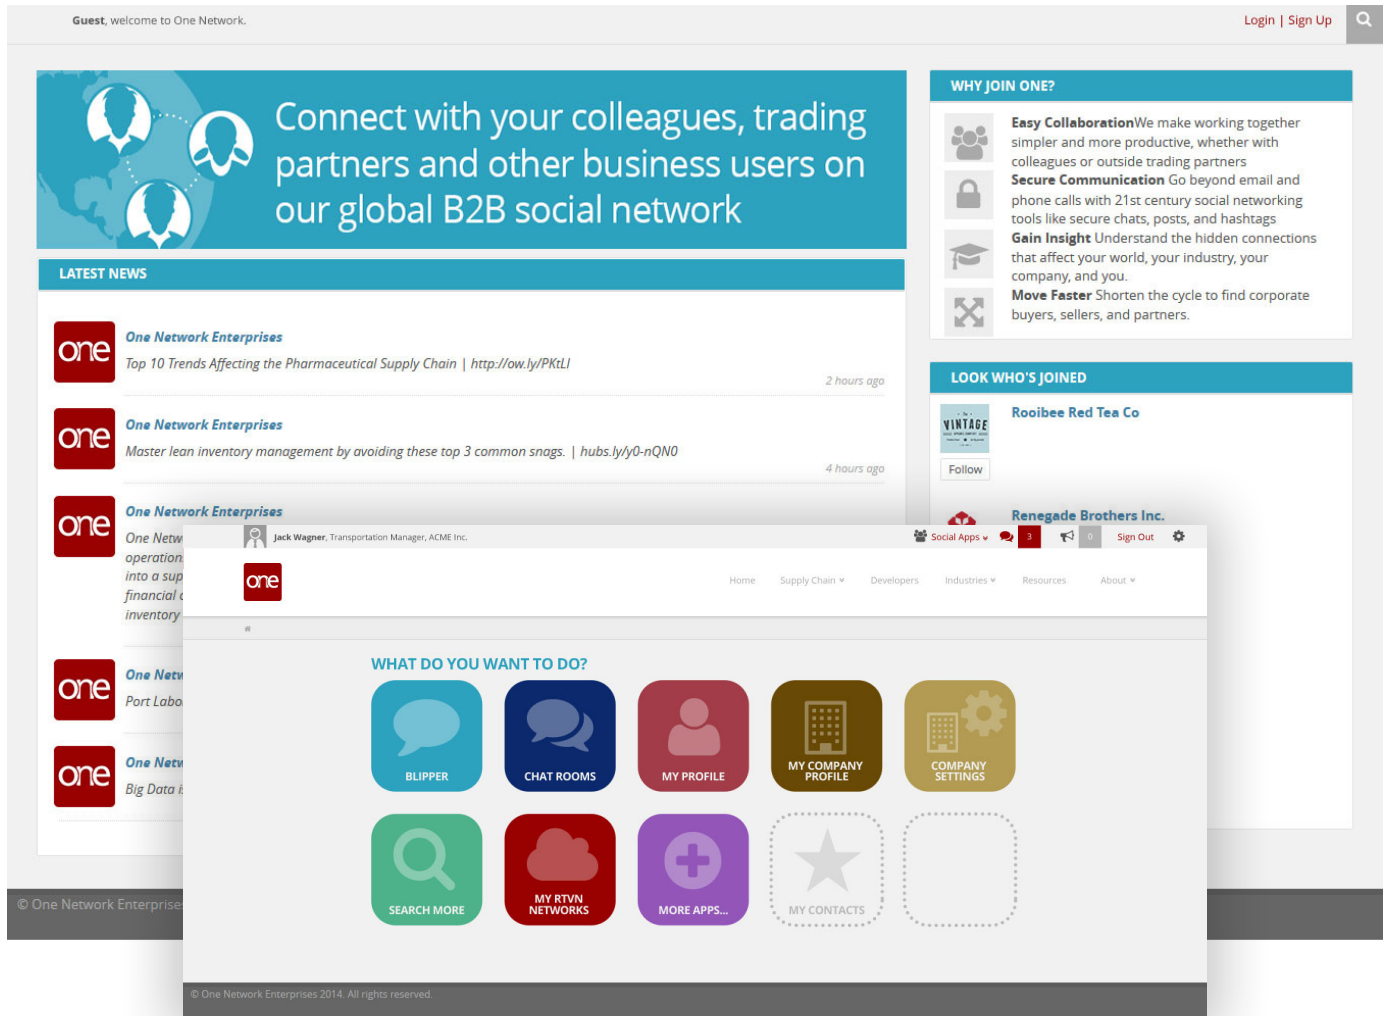

And unlike other enterprise social applications, which are focused on communications within a company, *One Network's Social Apps support communications within the company and with outside parties.*

WHAT'S INCLUDED?

Social Apps enable enterprises to collaborate with ease in a variety of ways.

Social Apps includes **Chat Rooms** where you have full control over who is invited and who may attend, such as colleagues, customers, vendors. Discuss issues and maintain a record of decisions reached.

Social Apps also includes **Blipper™**, an enterprise-level social networking application which allows users to publish content to an activity stream. Users can "blip" publicly or privately, and publish blips as themselves or on behalf of another entity such as a company, product, or topic.

WHAT DOES THIS MEAN?

Say goodbye to endless emails and phone calls... with Social Apps, everyone can join one conversation, and get problems resolved quickly and efficiently.

By combining transactions and their related unstructured communications, Social Apps eliminate the need for phone calls, emails, and the needless back and forth required to do business today.

The result is faster, better decision-making.

With a rapidly growing community of more than 100,000 companies and people using One Network's cloud platform, Social Apps brings immediate value, enabling everyone to more easily connect, collaborate, and transact.

BEYOND SOCIAL APPS: HOW WE CAN HELP

One Network offers a unique approach to supply chain management and other multi-party problems. Our cloud platform, the Real Time Value Network, eliminates the traditional divide between planning and execution and enables visibility and data flow across your entire supply network of trading partners...in real time.

Additionally, One Network offers PaaS solutions and developers tools that enable organizations to design, build, and run multi-party applications that solve problems unrelated to their supply chains.
