UroLift 2 System

UroLift ATC System

UroLift 2 Procedural Case

BEFORE

AFTER

Individual results may vary

Indicated for the treatment of symptoms of an enlarged prostate up to 100cc in men 45 years or older. As with any medical procedure, individual results may vary. Most common side effects are temporary and include hematuria, dysuria, micturition urgency, pelvic pain, and urge incontinence.<sup>3</sup> Rare side effects, including bleeding and infection, may lead to a serious outcome and may require intervention. Consult the Instructions for Use (IFU) for more information.

CAUTION: Federal (USA) law restricts this device to sale by or on the order of a physician.
