

Traditional MIPS versus MVPS

Traditional MIPS	MIPS Value Pathways
Four performance categories leveraging the entire measure and activity inventory for Quality, Promoting Interoperability, Improvement Activities and Cost.	Subset of quality and cost measures, and improvement activities are specific to a given specialty or medical condition.
For the Quality category, 6 measures are required for reporting from a broad selection of quality measures.	For the Quality category, 4 measures are required to be reported with additional population health measures calculated by administrative claims.
Does not allow subgroup reporting.	Allows subgroup reporting.
	For Improvement Activities, credit is provided and point value doubles for MVP participation.
	Foundational layer consists of administrative claims quality measures and Promoting Interoperability.
